

**DHM 50** 50 cm belt width, tabletop usage, stainless steel safety cover, stainless steel food contact parts for hygiene. Easy to use thickness adjusting mechanism.

**DHM 60** 60 cm belt width, AISI 304 Stainless steel body, safety cover and all food contact parts for hygiene. Easy to use thickness adjusting mechanism. Belt speed is variable.

### Specification

DHM Series sheeters provide very smooth and non-tear products for every kind of doughs. Easy to use adjustment lever allows different thicknesses. Rollers, covers and all food contact parts are made AISI 304 stainless steel

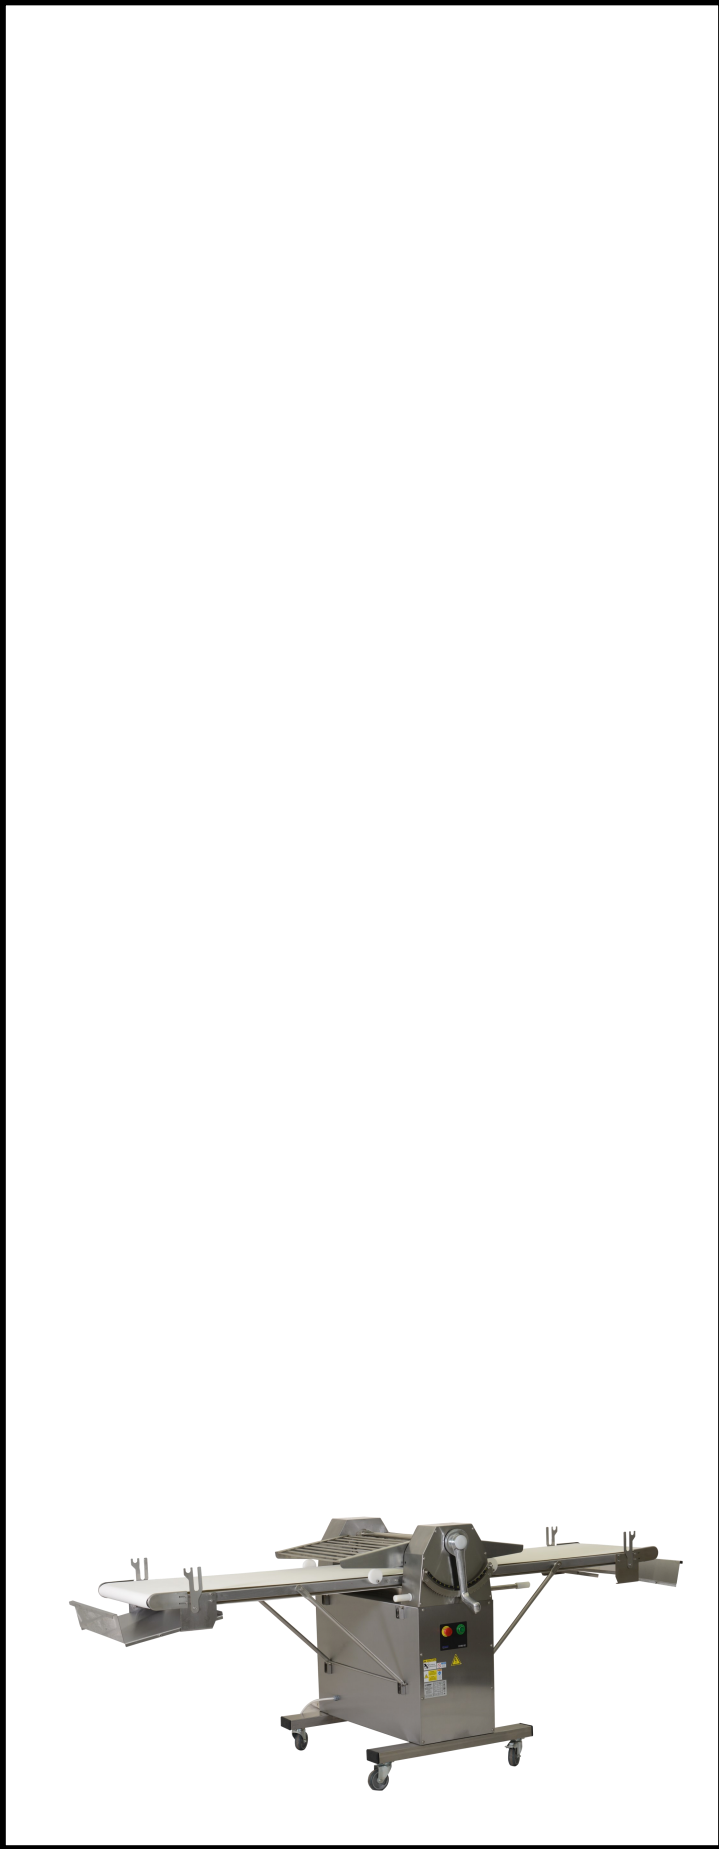

### Main Features

- Dirmak equipments are designed for long-term usage under heavy duty conditions. Dough sheeters are equipped with stainless steel food contact parts for hygiene
- Tabletop usage for DHM 50
- AISI 304 Stainless steel body for DHM 60
- Waterproof button control panel
- Adjustable speed for belts
- Hard chrome covered roller drive
- Scrapers for rollers
- Strong pulley-belt system,
- Minimum thickness 0,5 mm
- Maximum thickness 45 mm
- Safety device will automatically stop the machine when the cover opens.

### Construction

- Body painted with corrosion resistant electrostatic paint for DHM 50
- AISI 304 Stainless steel body for DHM 60
- Asynchronous motor with high start-up torque.
- Water protected spiral system (IP54 electrical controls, IP 32 overall machine)
- Power : 0,55 kW for DHM 50  
0,75 kW for DHM 60
